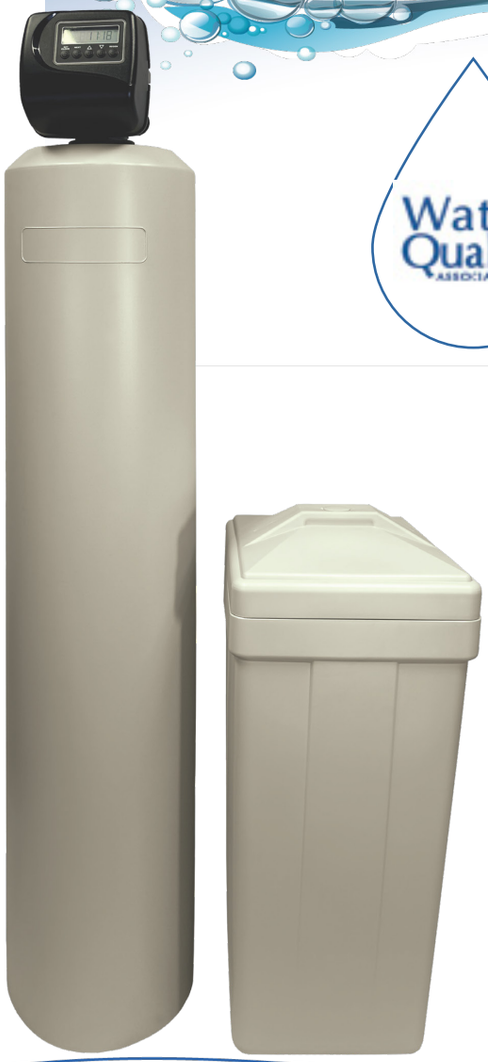
Premium Custom 4-Stage Whole Home Water Refiner

"Clean Products, Clean Lifestyle. The Future of Water is Here."



The Premium Custom 4-Stage Whole Home Refiner provides high-quality water in an efficient, compact design.

This unique design cleans the water for your home while also removing chlorine, chloramines, sediment, and other potentially harmful contaminants.

This cost-effective system uses a metered valve to save you money on water usage and salt making it a cost-effective investment that will help protect your home and your health for years to come.

Benefits to showcase with appropriate stock images:

- Soft & silky skin & hair
- Water-using appliances will last longer
- Dishes & Glassware are clean & spot-free
- Brighter, fluffier laundry

TARHEEL PURE WATER SERVICES
CLEAN WATER~ CLEAN LIFE.

Activated Carbon: Supreme grade catalytic carbon is used to remove chlorine, chloramine, and hydrogen sulfide from the water. Your water will have no odor and you'll notice improved skin & hair moisture without the chlorine!

Fine Mesh Resin: High capacity resin for hardness, turbidity, and iron removal. Our superior resin reduces/removes radium, hexavalent chromium, uranium, & vanadium.

KDF-85: Bi-metal material used to reduce/remove heavy metals, bacteria, & microorganisms such as algae & fungi. This layer offers broader contamination removal and extends the capabilities of the other 3 media.

Silica Gravel: Acts as a polisher to create sparkling clarity in water and ensure lots of bubbles, spot-free stemware, and a cleaner home. It also captures sediment & impurities from water & helps to distribute water evenly inside the media bed. This prevents clogging inside the system.
